- .env file

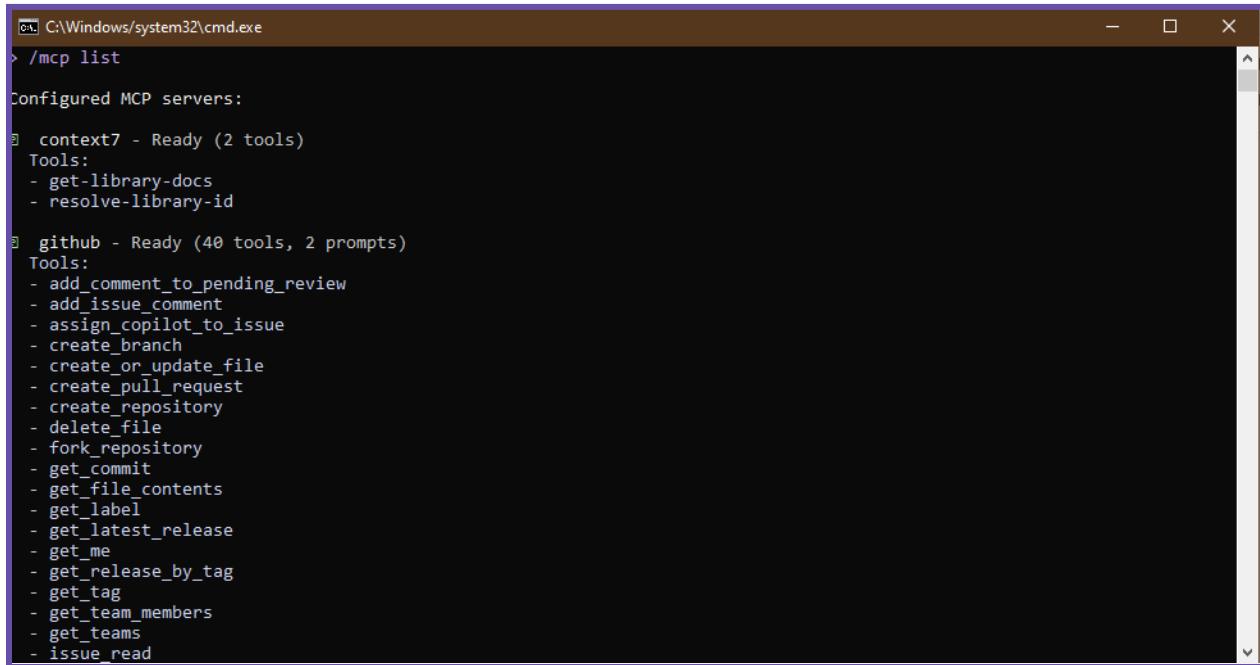

The screenshot shows a dark-themed code editor interface. In the top navigation bar, there are icons for File, Edit, Selection, and a search bar containing ".gemini". On the far right of the top bar are standard window control buttons. Below the top bar is a toolbar with various icons. The left side features a sidebar with icons for file operations like Open, Save, Find, and others. The main area is divided into two panels: the Explorer panel on the left and the Editor panel on the right. The Explorer panel shows a directory structure under ".GEMINI": tmp, .env, google_accounts.json, oauth_creds.json, settings.json, settings.json.orig, and state.json. The .env file is selected. The Editor panel displays the contents of the .env file, which includes a single line of code: GITHUB_MCP_PAT = "REDACTED". At the bottom of the screen is a footer bar with several status indicators and tool buttons.
